Report Measure List CO2 Performance Ladder 2024

Global measurement

CO ₂ emissions, scope 1 and 2		1 954 tons
Revenue	380 million euros	5.142 tons/million euros
Staff members	574.19 FTE	3.403 tons/FTE
Sectors	Installation technology	

Overview of measures

Business halls and areas

Outdoor LED lighting Increasing the efficiency of the activity		
Categorie B	100% of the lighting on company grounds consists of LED lighting	Implemented on 11/2024 Daar waar de terreinen verlicht zijn is het steeds LED.

Equipment

Electrification of hand tools Electrification		
Categorie B	Verifiable policy for the replacement/introduction of electric power tools instead of fuel-powered hand tools	Implemented on 06/2024

Maintaining equipment in line with factory specifications. Organisation-wide measure		
Categorie A	The company is able to demonstrate that at least 75% of machines are maintained in accordance with the factory specifications and the maintenance schedule	Implemented on 01/2024

Use of zero emission mobile machines Electrification		
Categorie C	The company is able to demonstrate that it uses multiple mobile machines powered by zero emission technology.	Implemented on 09/2024

Zero emission forklift trucks Electrification		
Categorie C	All forklift trucks are zero emission vehicles, for indoor as well as outdoor use.	Implemented on 01/2024

Offices

Benchmarking and optimising energy consumption Increasing the efficiency of the activity		
Categorie A	For at least 75% of offices, data from the main meter is recorded and benchmarked annually against similar premises (via Milieubarometer, e-nolis or similar).	Implemented on 11/2024 Verbruik is in kaart en zal in december gebenchmarked worden

Heating based on green gas Renewable energy		
Categorie C	Over 50% of the usable area is heated using green gas	Implemented on 01/2024 Alle gekochte gas is groen gas.

Make charge points available for electric vehicles.

Electrification

Categorie A	Minimally 1 charge point per 20 parking spaces	Implemented on 11/2024
-------------	--	------------------------

Public transport location choice

Organisation-wide measure

Categorie C	All building area is located near public transport (maximally 500 m).	Implemented on 01/2024
-------------	---	------------------------

Use of sustainable heat and/or heat and cold storage

Renewable energy

Categorie C	Space heating using sustainable heat accounts for more than 80% of the total energy consumed in the organisation's offices for heating and cooling.	Implemented on 01/2024 Overal wordt er verwarmd met groen gas uitgezonderd één vestiging, welke verwarmd wordt met rest warmte.
-------------	---	--

Organizational policy general

No measures have been taken for this activity.

People mobility

Promoting efficient driving: 'Het Nieuwe Rijden'

Increasing the efficiency of the activity

Categorie A	Provision of fuel-efficient driving toolbox to all drivers	Implemented on 11/2024 Toolbox rond Eco-defensief rijden.
-------------	--	--

Promotion of train travel for long distances

Organisation-wide measure

Categorie B	The organisation requires travel by train for distances less than 700 km, provided that travel by train from door to door takes less than 150% of the time if travelling by plane	Planned for 12/2024
-------------	---	---------------------

Provision of bicycles, electric bikes or electric scooters

Organisation-wide measure

Categorie B	The company operates a scheme that offers all employees reimbursement for the purchase of a bicycle or an electric bike.	Implemented on 09/2024 Via leasing worden elektrische fietsen aangeboden. Dit biedt de WN fiscaal voordeel in belastingen, het bedrijf past een bedrag, de basis prijs ligt lager omwille van groepsaankoop. Onderhoud en verzekering is inbegrepen in de lease. Dit voor alle WN zodra ze vast in dienst komen.
-------------	--	---

Purchase/leasing of passenger vehicles based on carbon emissions measured in practice

Increasing the efficiency of the activity

Categorie C	The carbon emissions of new passenger vehicles (purchased or leased) average less than 80 g/km over the course of a year (according to data measured in practice)	Implemented on 11/2024
-------------	---	------------------------

Reduce personal mobility by working from home and teleconferencing

Restricting activity

Categorie B	The average amount of travel (commuting, business trips) per employee with an administrative job is demonstrably reduced by 20% compared to before the coronavirus outbreak (2019)	Implemented on 11/2024 Er wordt gemiddeld 1 dag in de week thuis gewerkt.
-------------	--	--

Reducing car usage

Restricting activity

Categorie B	Introduction of an individual mobility budget for all staff driving a lease car, with the aim of reducing the number of lease cars and/or cutting down on the number of kilometres travelled by car.	Implemented on 05/2024 Mensen die in aanmerking komen voor een lease wagen kunnen ervoor kiezen om deze niet te nemen en dit budget in te zetten voor andere vormen van mobiliteit.
-------------	--	--

Speed limiters in vans

Increasing the efficiency of the activity

Categorie B	The company implements speed limiters for all new vans, including where use of a limiter is not already obligatory.	Implemented on 11/2024 In alle nieuwe wagens type lichte vracht wordt de snelheid beperkt tot 110.
-------------	---	---

Zero emission vehicles

Electrification

Categorie C	15% of the fleet (passenger and commercial vehicles, owned or leased) consists of zero emission vehicles. Upon expiry of the lease contract or a with a new purchase, a zero CO2 emission vehicle is always ordered	Implemented on 05/2024
-------------	---	------------------------

Waste**Insight into CO2 avoided as a result of the processing of waste streams**

Organisation-wide measure

Categorie C	The company improves its insight into chain emissions avoided by demonstrably producing annual reports that provide greater detail regarding elements of the most important chains. It does this by, for example, using emission factors based on own measurements or specific emission factors reported by chain partners.	Implemented on 01/2024 Dit wordt aangeleverd door Van Hapen de partij waarmee samengewerkt wordt voor het inzamelen van de afvalstoffen.
-------------	---	---

Not selected activities

The following activities have not been selected: Subcontractors and suppliers, Hydraulic engineering ships, Logistics & transport, Construction site, Advice, Material use / Scope 3, ICT services, Procurement, Business processes, Green maintenance.
